**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 12-17, 40-44, 45-49, and 50 are drawn to an interface, medium and system for controlling data transfer in a synchronous or split mode, classified in class 711, subclass 156.
- II. Claims 8-11 are drawn to a method for write completion/communication of a tape library, classified in class 711, subclass 111.
- III. Claims 18-34 and 35-39 drawn to a system and medium for tape identification and communication with error correction and defective devices, as well as system protection mechanisms, classified in class 714, subclass 5.

1. The inventions are distinct, each from the other, because of the following reason:
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II and III have separate utilities. Group I could be usable in arrayed storage devices that require data transfer to occur in synchronous or split modes, depending on the application. Group II could be usable in devices wherein write completion and communication to a tape-

based library is needed, for instance. Group III could be usable in devices wherein identification, communication with error correction and defective devices, as well as system protection mechanisms were all needed. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Groups II and III (separately) are not required for Group I, restriction for examination purposes as indicated is proper.
